

Working scientifically in the primary curriculum - pupil led investigations

Pupils are enthused and motivated when they are involved in planning their own enquiries and when they can see the relevance of them to their own lives.

The course

Explore a range of techniques to help you draw out pupils' ideas. Working with others you'll develop strategies to incorporate these ideas into your science lessons to inspire your pupils to view and investigate their world more scientifically.

Outcomes

You'll be confident in your ability to plan creative science teaching in your school, using the direction your children's ideas and suggestions take you in.

"The course was very thorough and covered a lot of interesting materials and information relating to teaching science creatively."

Ellen Ellis, 2016 participant

Date: Day 1: 15 February 2018

Day 2: 27 March 2018

What are you looking for?

PROFESSIONAL DEVELOPMENT

We offer high-impact professional development across the UK, and online, based on the latest developments in both pedagogy and STEM subjects. We can also tailor professional development to your school's specific needs with our bespoke CPD.

CAREERS EDUCATION

As well as a host of excellent resources on our website including the Careers Toolkit, we also run the STEM Insight programme to give you a unique experience in industry or university through inspiring placements.

INSPIRATION

We've got a host of ways to help you inspire your students: why not bring a STEM Ambassador into your school to talk about STEM subjects and careers, or start a STEM Club to build confidence and teamwork skills?

COMMUNITY

Share your ideas and challenges with teachers and technicians through our online groups and at our networking events. And join us on Twitter - we have over 20,000 like-minded educators following us.

National STEM Learning Centre and Network

RECOGNITION

Our recognition schemes and awards allow you, your department and school to showcase the impact you have on your students and colleagues.

RESOURCES

We have over 38,000 quality, STEM teaching resources, available online or at our centre. You can also browse teacher-made resources and submit your own.

STEM Learning operates the National STEM Learning Centre and Network, alongside other projects supporting STEM education
